2. Bartholomew

March 12.

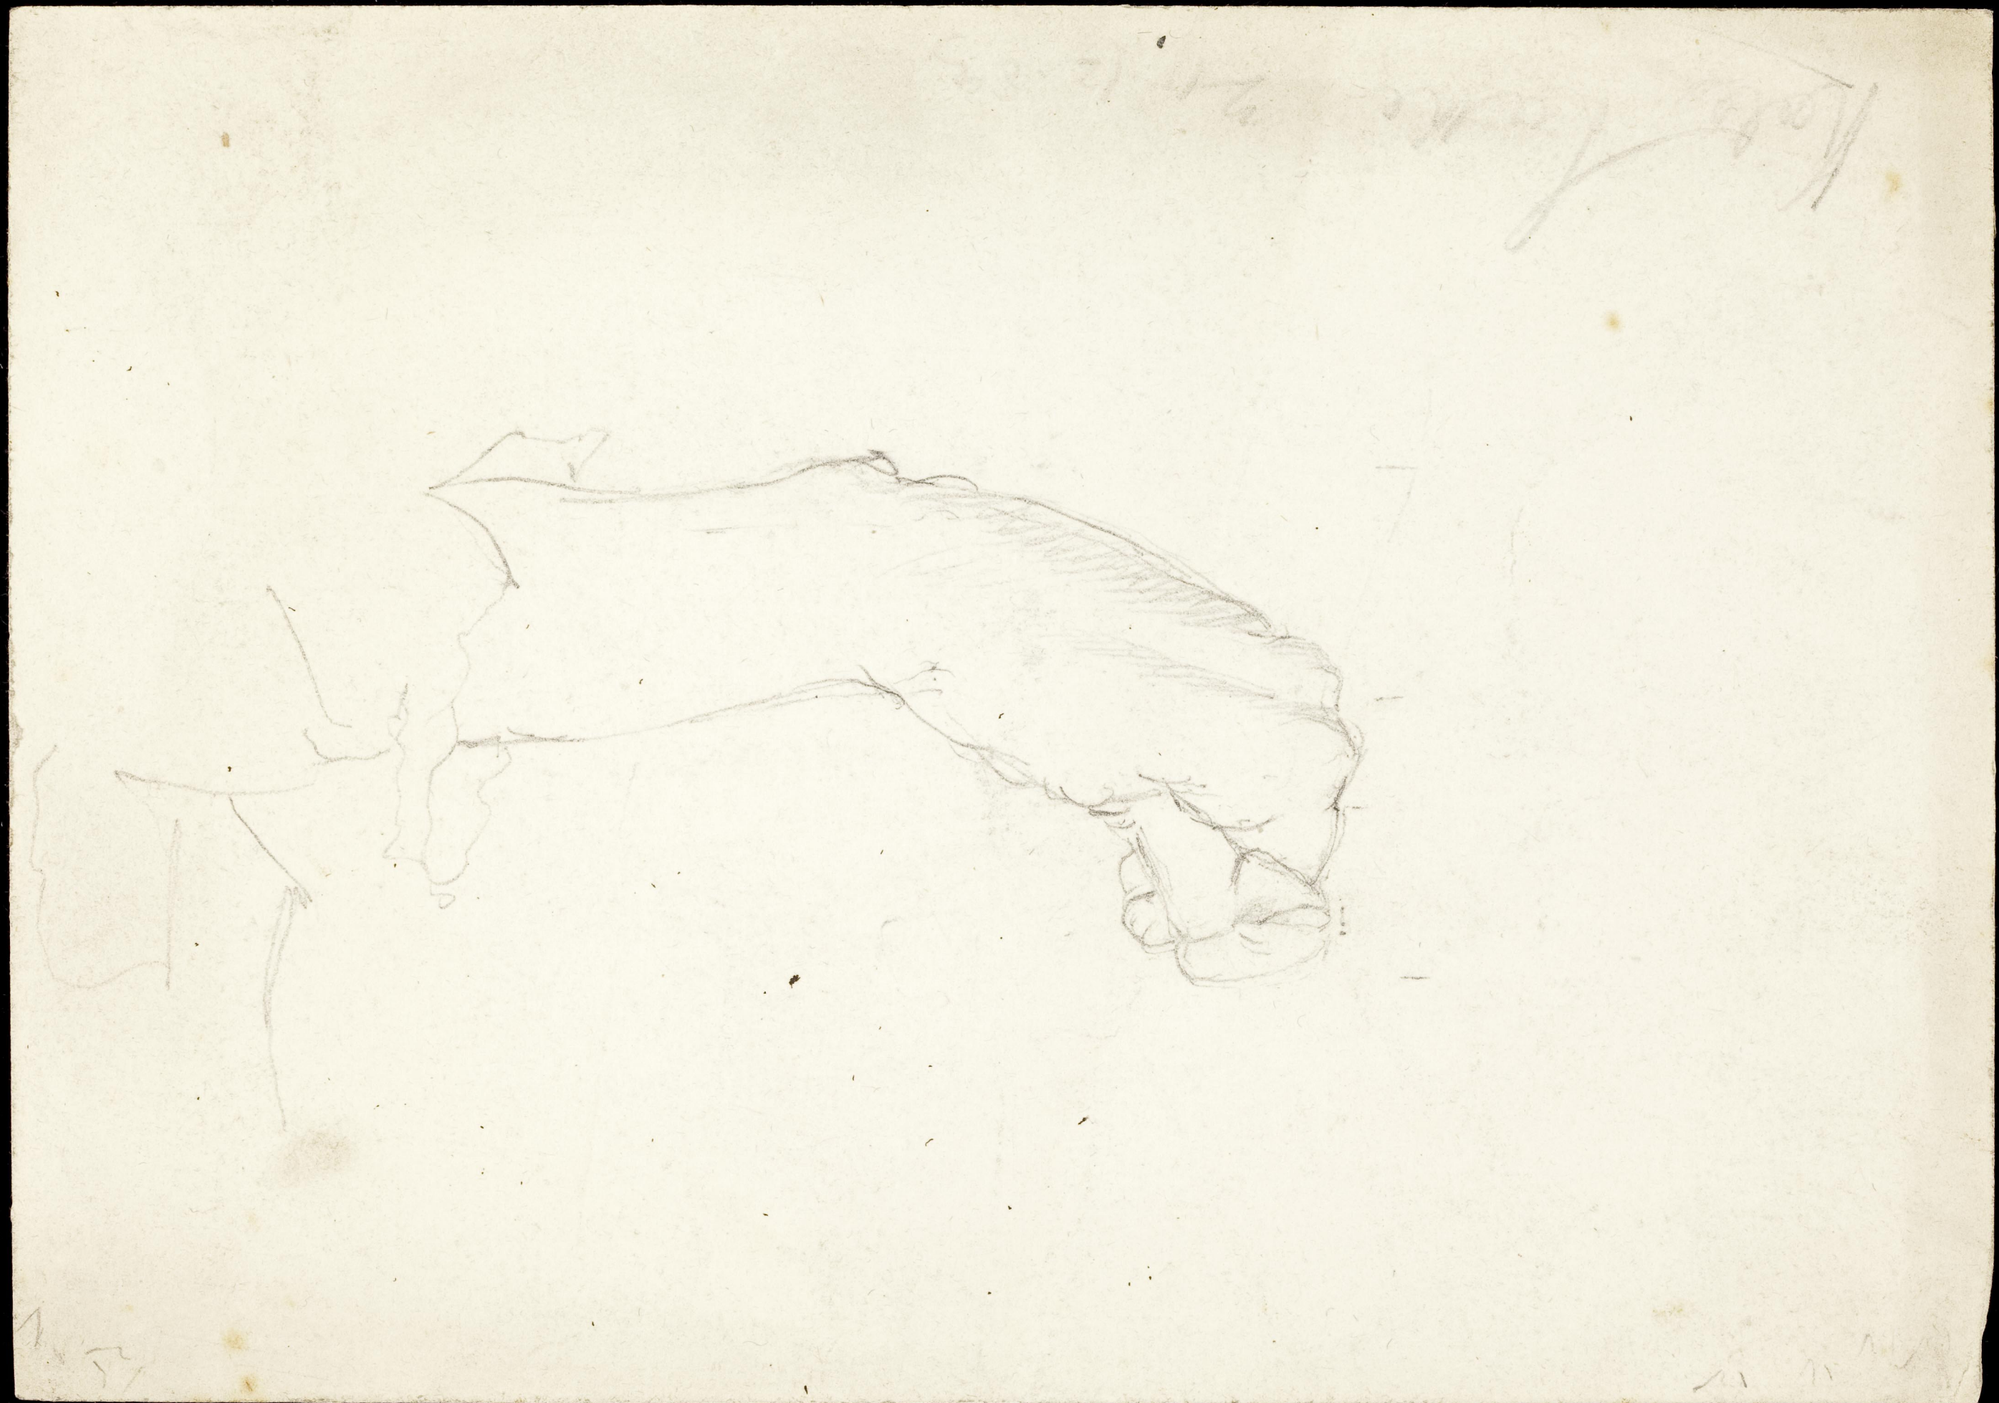

Contracted Palmar Fascia

Fingers Can be nearly extended fully. The 3rd finger le
can scarcely be extended at all. The "median portion" of the
can be felt as a firm tendinous band passing
iger. The "inner lateral portion" is also to be felt passing
ger. The outer lateral portion cannot be felt. The gra
set fractual. P.t's wrists compelled him to be freq
cutting him with Shears.
